Personal

Felipe R. Monteiro is currently a Software Engineer at the Eldorado Institute and is pursuing a M.Sc. degree in Computer Science at the Federal University of Amazonas (UFAM). He earned his bachelor's degree in Computer Engineering from UFAM and he was awarded the Science without Borders scholarship, which has sponsored his studies in the Computer Science course at the Goldsmiths University of London, in 2013-2014. He has worked on 7 research and development (R&D) projects and his main experiences are in formal verification, model checking, and software engineering. His most recent work implements bounded model checking based on satisfiability modulo theories to handle verification of C++ programs.

Education

M.Sc. Computer Science, Federal University of Amazonas, 2018 – currently.

B.Eng. Computer Engineering, Federal University of Amazonas, 2011 – 2017.

Exchange Program in Computer Science, Goldsmiths University of London, 2013 – 2014.

Technical in Software Programming, National Service of Industrial Learning, 2010 – 2011.

Professional Experience

1. **Software Engineer** at Eldorado Institute, 01/2018 – Currently
 - Research on battery management for Android-based smartphones;
 - Development of Android application to perform stress test hardware components and measure current drain;
 - Programming tasks including enhancements, maintenance and testing in Android applications.
 - [Eldorado Institute](#)
2. **Research Fellow and Developer** at Electronic and Information Research Center, 10/2011 – 10/2017
 - Research on formal verification of digital systems ([DSVerifier](#))
 - Research on model checking of C++ programs based on the Qt framework ([QtOM](#))
 - Research on model checking of CUDA-based applications ([ESBMC-GPU](#))
 - Programming tasks including enhancements, maintenance and testing (C/C++).
 - [Systems & Software Verification Laboratory](#)
3. **Google Summer of Code Student** at Checker Framework, 06/2017 – 08/2017 (*sponsored by Google*)
 - Research on whole-program inference ([Checker Framework](#))

- Programming tasks including enhancements, maintenance and testing (Java).
 - [Google Summer of Code 2017](#)
4. **Internship** at Samsung Electronics, 04/2015 – 01/2016
- Mobile application development (Android)
 - Programming tasks including enhancements, maintenance and testing (Java).
 - Led, architected and participated in the design, testing and deployment of an Android application and related components. In addition, participated as scrum master.
5. **Research Fellow and Developer** at [Institute of Technology Development \(INdT\)](#), 11/2011 – 04/2013
- Research on formal verification of C++ programs using SMT-based BMC ([ESBMC++](#))
 - Programming tasks including enhancements, maintenance and testing (C/C++).
 - [Systems & Software Verification Laboratory](#)
6. **Research Fellow** at Institute of Computing, 04/2011 – 12/2011
- Research on assistive technology for autistic children
 - Usability and semiotic engineering of human-computer interaction
 - Laboratory of Intelligent Systems

Accomplishments

Silver Medal at the International ACM Student Research Competition, Association for Computing Machines, 2016.

Best Mobile Application Award of the 3rd Meeting of Technological Innovation, Samsung Electronics of Amazonia Ltda., 2016.

Woody Bledsoe Student Travel Award at the 9th International Joint Conference on Automated Reasoning, 2018.

12 revised publications. Full list available at [Google Scholar](#).

Technology Summary

Agile Methodologies (e.g., SCRUM and Kanban);

Version Control (e.g., Git and Github/Gerrit);

Issue tracker (e.g., Jira);

Programming (e.g., ANSI-C, C++, Java, Android, Python);

Building Tools (e.g. cmake, ant, and Autotools);

IDE (e.g., Eclipse and Android Studio);

Continuous Integration (e.g., Travis CI);

MATLAB, Simulink, LabView;

Embedded Systems, UML, L^AT_EX;

Linux, Mac OS X, Windows.

Additional Skills

Proficient in English.
